Step 3 : Click on Sign-in & Security

Step 4 : Scroll down & choose Password

Sign-in & security

Security Checkup

Protect your account in just a few minutes by reviewing your security settings and activity.

[GET STARTED](#)

Signing in to Google

Control your password and account access, along with backup options if you get locked out of your account.

Make sure you choose a strong password
A strong password contains a mix of numbers, letters, and symbols. It is hard to guess, does not resemble a real word, and is only used for this account.

Password & sign-in method

Your password protects your account. You can also add a second layer of protection with 2-Step Verification, which sends a single-use code to your phone for you to enter when you sign in. So even if somebody manages to steal your password, it is not enough to get into your account.

Note: To change these settings, you will need to confirm your password.

Password	Last changed: September 4, 6:12 PM	>
